

Year Groups 5 and 6

Monday 15th June 2020

Subject: Science - Animals including Humans

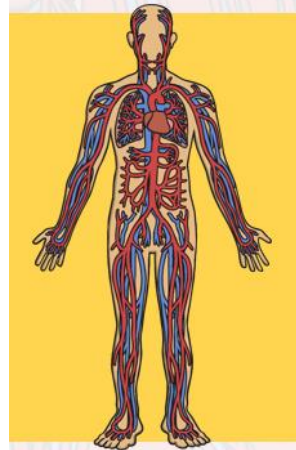

Lo: I can identify and name the parts of the human circulatory system.

Previous learning - Different body systems and what they do.

Key Vocabulary

System, human, body, circulatory, circulation,

The Circulatory System

What can you see?

Is this what you expected?

Are there parts you did not expect to be in the circulatory system?

The system we will look at for the rest of this lesson is called the:

'Circulatory System'.

The word **circulation** means 'the movement to, fro or around something'.

Parts of the Circulatory System: Heart

The heart is a powerful organ that is situated between your lungs and protected by the ribcage.

The heart pumps blood to the lungs to get oxygen.

The heart then pumps this oxygenated blood around the body.

The heart is split between the left and right side.

As you can see, it consists of many parts!

Watch this video clip.

Activity

Go to Purple Mash 2Dos - Summer 2 Science Lesson 2

Label the parts of the heart.

Drag the clipart labels to the correct places on the diagram.
