

Year Groups: Years 1 and 2 (KS1) Date: Monday 27th April 2020

Subject: Science - Seasonal Change

LO: I can observe and describe types of weather (clouds).

Prior learning: What is a season? What are the names of these?

Key Facts:

What are clouds and how do they get there?

- Clouds are made of tiny droplets of water.
- When the sun warms the water in a puddle or from the sea, it changes and floats up into the air.

Pre-Learning Activity: What are clouds?

Watch this video below to see how clouds are formed. Watch up to 2minutes 5 seconds.

<https://www.youtube.com/watch?v=eCumUup9vWQ>

Activity 1: Observe what different clouds you can see.

Create a 'cloud chart' based on the clouds you see this week. You can do this on paper.

Remember to share your cloud charts on twitter! E.g.

Day of the week	Observation
Monday	
Tuesday
